

Job Title – Research Analyst

Our growing firm seeks a Research Analyst. The role is an important part of the research and consulting support that FUSE provides to our asset manager clients, contributing to published research pieces, recurring reports, and bespoke research assignments. A successful candidate combines intellectual curiosity, aptitude with data, and a desire for a flexible mix of duties; for example, in a given week the research analyst might retrieve and format data on mutual funds, collect information from SEC filings, write a blog post and help identify priorities for particular sales strategies.

Job Objectives:

- Analyze and present industry data to support our clients and their research needs
- Collect and analyze market intelligence for use in ongoing research publications, regularly produced client updates, and ad hoc projects
- Enhance existing research and explore new sources of data
- Write short research pieces or chapters in longer reports
- Maintain and regularly update data sources used in reporting and analysis

Qualifications:

- One to three years of work experience, preferably in financial services
- Aptitude for synthesizing information, and for interpreting and working with data
- Strong attention to detail and emphasis on accuracy
- Capability to work well both independently and on a team
- Ability to adapt to changing priorities in an effort to meet multiple project timelines and client needs
- Proficiency in Excel, Word and PowerPoint

- Strong writing and speaking skills
- College degree is required; completion of, or progress toward advanced designations, such as CIMA®, CAIA® or CFA® is a plus
- Experience with Morningstar Direct and/or Excel VBA or SQL is a plus

Compensation: Competitive with market rates (based on experience)

Hours: 40 Hours per week, Monday to Friday

Location: Needham, MA

Reports to: Director of Research

Benefits include: Medical and dental plan, paid vacation and more.
